

HYBRID BUCKET

CBW180/10 CBW200/12 CBW230/20 CBW230/25 CBW260/20 CBW260/30 CBW280/45 CBW300/65

Hybrid bucket is FMG's patented equipment, that is combined as a flipper bucket and ice-removing bucket. Due to the special structure Hybrid bucket works as flipper bucket so that the ice-removing blade does not catch the ground. When the bucket is tilted back so that the cutting edge rises from the ground, the ice-removing blade starts to remove the ice. The removed ice is getting into the bucket and ready to be tipped onto the bench.

All FMG's products have 2-year manufacturer's warranty.

Customer deliveries of FMG Hybrid bucket will begin in autumn 2023.

STANDARD EQUIPMENT

- Perforated blades in the wing, toothblades as cutting edge and ice-removing blade
- Extension walls for the bucket
- Spring loaded wings
- ½' couplings M+F, M+M, F+F
- Adapters with screws (CBW180/10, CBW200/12, CBW230/20, CBW260/20)
- Welded adapters (CBW230/25, CBW260/30, CBW280/45, CBW300/55)

OPTIONAL EQUIPMENT

- Toothed hard metal blade as ice-removing blade
- Electric valve 6/2
- Accumulator

Model	Working width, cm	Depth, cm	Volume, m ³	Weight, kg
CBW180/10	180-300	110	1,0	400
CBW200/12	200-320	110	1,2	700
CBW230/20	230-392	125	2,0	810
CBW230/25	230-424	145	2,5	1115
CBW260/20	260-422	125	2,0	950
CBW260/30	260-454	145	3,0	1250
CBW280/45	280-490	155	4,5	1450
CBW300/55	300-510	155	5,5	1600
