

SCRAPER

RAP245 RAP275 RAP300

The hydraulic pressure system enables to transfer the tractor weight to the blade. That helps to effectively remove the ice and hard-packed snow at wintertime. At the summertime, the blade bites effectively even the hard ground.

Stinger blades enable to use the scraper effectively at winter and summer (available as option).

Hydraulically operated support wheels enable to steer the tilt of scraper easily from the cabin (available as option).

DESIGNED FOR PROFESSIONAL USE

SIMPLE AND DURABLE CONSTRUCTION

SUMMER - levelling gravel roads

WINTER - ice removing

HYDRAULIC PRESSURE SYSTEM transfers the tractor weight to the blade

SCRAPER DOESN'T VIBRATE even on hard surfaces

BITES EFFECTIVELY even the hard ground

SHARP BLADE ANGLE

STANDARD EQUIPMENT

- evenblade
- support wheels with mechanical adjustment
- hydraulic pressure control
- 3-point adapters (rear)

OPTIONAL EQUIPMENT

- perforated blade
- stinger blade
- Support wheels hydraulically operated
- Extension wing right (10°)
- Extension wing left (45°)
- Extension wing, right (straight)
- Extension wing, left (straight)

Model	Width, cm	Blade height, cm	Extension wing, cm	Working width, cm	Weight, kg
RAP245	245	55	25	215 - 245 (305*)	640
RAP275	275	55	25	245 - 275 (335*)	650
RAP300	300	55	25	270 - 300 (360*)	680
